Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Applicant's response filed on 01/27/2005 has been fully considered. Claims 1-7 are amended, claims 8-11 are added, and thus claims 1-11 are pending. The previous rejection has been withdrawn in view of Applicant's amendment and comments.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takada et al. (JP 10-250240).

Takada discloses a dye thermal transfer receiving sheet comprises a separator portion having a separating sheet base and a release agent layer formed over one side of the separating sheet base, and an image receiving sheet portion having a receiving sheet base, a dye image receiving layer formed over one side of the receiving base sheet and an adhesive layer on side thereof, wherein the adhesive layer faces the release agent layer (abstract). A half-cutting process is also performed [0004]. Takada discloses the claimed invention except the size of the cut portions. It would have been obvious matter of design choice to vary the size of the cut portions, since such a motivation would have involved a mere change in the size of a component. A change in

size is generally recognized as being within the level of ordinary skill in the art. *In re* Rose, 105 USPQ 237 (CCPA 1955).
